For the nine months ended 28 February 2026, the Group recorded higher revenue of RM25.7 million compared to RM24.9 million in the corresponding period last year. However, the Group reported lower profit before taxation ("PBT") of RM0.5 million as compared to RM1.5 million in the corresponding period last year.

For the financial quarter ended 28 February 2026, the Group recorded slightly higher revenue of RM8.3 million compared to RM8.2 million in the corresponding period last year. However, the Group reported a loss before taxation of RM0.3 million compared to PBT of RM0.2 million in the corresponding period last year.

Review of business segments for the financial quarter ended 28 February 2026

For the nine months ended 28 February 2026, the Logistics segment posted higher revenue of RM25.7 million compared to RM24.9 million in the corresponding period last year, primarily attributable to higher sales in the tank farm business. Despite growth in revenue, segmental profit decline to RM4.4 million from RM5.1 million in the corresponding period last year increased maintenance and repair costs for the fleet of prime movers.

The performance of the others segment was mainly attributed to corporate expenses from the investment holding company. This segment reported a segmental loss of RM1.6 million, which was lower than the RM2.3 million loss recorded in the corresponding period last year.

B2 Material change in the results for the current financial quarter as compared with immediate preceding financial quarter

Revenue for the current financial quarter increased slightly to RM8.3 million from RM8.2 million in the immediate preceding quarter. However, the Group recorded a loss before taxation of RM0.3 million in the current financial quarter compared to RM0.2 million loss in the immediate preceding financial quarter.

B3 Current year prospects

The global economy is currently exposed to elevated risks stemming from heightened trade tensions, policy uncertainties, and recent conflicts in the Middle East involving Iran. These developments have resulted in increased volatility within both energy and shipping markets worldwide. Disruptions at key transit routes, such as the Strait of Hormuz, have driven up oil prices, further intensifying uncertainty around trade and inflation. Collectively, these factors have significantly disrupted business operations, exacerbated by persistently high energy and fuel costs and continued interruptions across supply chains.

While Malaysia has experienced growth in oil and gas revenues, these advantages are tempered by expensive imports, ongoing supply chain disruptions, and diminished export demand. The ongoing conflict exacerbates economic risks and uncertainty, creating additional challenges for inflation control and fiscal management among Malaysian businesses and policymakers.

The management shall remain vigilant in light of the difficult operating environment. The Board remains committed to exercising prudence in managing the business under these conditions.

B4 Forecast profit, profit guarantee and internal targets

The Group did not provide any profit forecast, profit guarantee and internal targets in any publicly available documents or announcements.
