Dear Sir/Madam

**CONTRACT J107 – DESIGN AND CONSTRUCTION OF JW1, JW2 AND VIADUCT FOR JURONG REGION LINE
– Pile Driving Analyzer (PDA) Tests**

The Land Transport Authority (LTA) has awarded Jurong Region Line (JRL) Contract J107 to **CES_SDC Pte. Ltd.** for the design and construction of JW1, JW2 and viaduct.

As part of the foundation works, dynamic pile monitoring is used on driven pile to ensure the pile structural integrity during driving and the data is needed to evaluate shaft integrity, driving stresses, and hammer energy when monitoring installation. The test involves a one-time drop of an adequate weight that impacts the top of the foundation and causes it to experience a small permanent set. This may cause a strong vibration feedback and noise disturbance, where mitigation measures are in place to closely monitor the impacts to be within allowable work limits.

Please refer below for more details of the upcoming 2 PDA tests. The location for the 2 PDA tests is listed out in our work zone (Annex A) for your reference.

	Date	Time	Location
1	Aug 31, 2022	2:00 pm	Within work zone near the junction between JW St 74 and St 75
2	September 2, 2022	2:00 pm	Within work zone near the junction between JW St 74 and St 75

Should you have any queries, you may contact our Project Senior Public Relations Officer, Ms Wong Poh Yin at our project hotline number 9699 0107.

We look forward to your continued support for the Jurong Region Line.

Thank you.

Yours sincerely

Goh Peishan
