

INFOMINA SECURES RM62.6 MILLION TECHNOLOGY REFRESH AND MAINTENANCE CONTRACT FROM A FINANCIAL INSTITUTION IN MALAYSIA

69-Month Contract Further Strengthens Recurring Revenue Base and Earnings Visibility

KUALA LUMPUR, 24 September 2026 – Technology solutions provider **Infomina Berhad** 盈获数码科技集团 (“**Infomina**” or the “**Group**”) has secured a contract from a **financial institution in Malaysia** (“**the Financial Institution**”) for the provision of technology refresh supply and maintenance services, further strengthening the Group’s portfolio of long-term technology infrastructure and maintenance engagements.

Infomina had on 24 September 2026 signed and accepted the Letter of Award (“**LOA**”) from the Financial Institution. The contract, valued at **RM62,645,558.36** (including Sales and Services Tax), has a tenure of 69 months, commencing from 1 October 2026 to 30 June 2032.

Under the contract, Infomina will provide the Financial Institution with technology refresh supply and maintenance services, including the **supply, delivery, installation, configuration, integration, testing, commissioning, implementation, support and maintenance of hardware, equipment, software and other related items and services**.

Yee Chee Meng 余志明, Chief Executive Officer cum Managing Director of Infomina, commented:

“We are pleased to have been entrusted by the Financial Institution to support its technology refresh and maintenance requirements. This contract reflects the continued confidence that organisations place in Infomina’s capabilities to support their critical technology environments.

Long-term maintenance and support engagements remain an important part of our business model, providing recurring revenue while allowing us to build deeper and longer-lasting relationships with our customers. We look forward to working closely with the Financial Institution to ensure that its technology infrastructure remains reliable, resilient and well-supported throughout the contract period.”

The contract also reinforces Infomina’s strategy of expanding its recurring operations, maintenance and support services business alongside its technology infrastructure and enterprise solutions capabilities. As organisations increasingly modernise their technology environments to support growing digitalisation requirements, Infomina continues to see opportunities in helping enterprises and institutions refresh, optimise and maintain their critical technology infrastructure.

The Group will continue to pursue opportunities across both the public and private sectors, while leveraging its established technology expertise and growing portfolio of solutions across mission-critical infrastructure, cloud, data, artificial intelligence (“AI”), cybersecurity and managed services.

ABOUT INFOMINA BERHAD

Infomina Berhad (“Infomina” or the “Group”) is a regional technology solutions provider specialising in the design, implementation, operation, maintenance and support of enterprise technology applications and infrastructure that support customers’ core business operations.

Headquartered in Malaysia, the Group serves customers across Asia, including Malaysia, Singapore, Thailand, the Philippines, Indonesia, Hong Kong, China, Taiwan and Japan. Infomina has established expertise in mission-critical infrastructure and mainframe technologies, while expanding its capabilities across cloud, data, AI, cybersecurity and managed services.

As part of its long-term growth strategy, the Group has broadened its portfolio through subsidiaries including Infomina AI Sdn Bhd and Infomina Geolytik Sdn Bhd, which focus on AI-enabled solutions, analytics, digital platforms and industry-specific applications. Its proprietary platforms, including PaymentXchange, ValuationXchange, AiMod and AiExe, support digital transactions, property intelligence, automation and decision-making across enterprise environments.

Infomina also contributes to Malaysia’s digital ecosystem through its long-standing collaboration with Suruhanjaya Syarikat Malaysia (“SSM”), including the operation of the SSM Search Portal (www.ssmsearch.com) and enterprise data connectivity services.
