

ES Sunlogy gets shareholders' nod for related-party dealings as Kerjaya Prospek ties deepen

Wednesday, October 21st, 2026

ES Sunlogy Bhd has obtained shareholders' approval for a recurrent related-party transactions mandate as the mechanical and electrical (M&E) engineering and renewable energy group deepens its collaboration with strategic shareholder Kerjaya Prospek Group Bhd.

The mandate, approved at an EGM today, will facilitate routine business dealings with related parties on normal commercial terms, ES Sunlogy said in a statement.

Kerjaya Prospek invested approximately RM64.31 million to build a 31% stake in ES Sunlogy between July and August this year.

The two companies have worked together since 2018, with ES Sunlogy undertaking M&E works for Kerjaya Prospek's projects. They are now looking to jointly pursue mixed-use, industrial and infrastructure projects.

"The approval of this mandate will facilitate our ongoing business dealings with Kerjaya Prospek on normal commercial terms, supporting closer collaboration as we pursue new project opportunities together," said ES Sunlogy managing director Khor Chuan Meng.

The group is also expanding into high-voltage power transmission after upgrading its licence to 275kV last year. It has won a Tenaga Nasional Bhd substation project in Lembah Beringin, Selangor, and is targeting more grid-related work over the next two to three years.

In renewable energy, ES Sunlogy plans to bid for the upcoming Large Scale Solar 6 programme with a proposal combining solar generation and battery storage.

It currently operates the Junjong and Selarong large-scale solar photovoltaic plants, with capacities of 20.76MW and 29.99MW respectively.

Khor said the group aims to pursue industrial, data centre and infrastructure projects while growing recurring income from its solar assets. Meanwhile, its subsidiary Savelite Engineering Sdn Bhd won a RM15.63 million electrical works contract in September for a 1,078-unit serviced apartment project in Johor Bahru.

Earlier this year, the subsidiary was awarded a RM107.5 million M&E subcontract by China State Construction Engineering (M) Sdn Bhd for a building project in Johor. – **TMR**
