

Jati Tinggi, Kerjaya Prospek consortium wins RM568m TNB contract

Thursday, October 22nd, 2026

A CONSORTIUM comprising subsidiaries of Jati Tinggi Group Bhd and Kerjaya Prospek Group Bhd, alongside electrical and mechanical engineering firm Betapac Sdn Bhd, has won a RM568.2 million contract from Tenaga Nasional Bhd (TNB) for a substation project in Paka, Terengganu.

Jati Tinggi's wholly owned subsidiary Jati Tinggi Holding Sdn Bhd holds a 55% participation in the consortium, while Kerjaya's wholly owned Kerjaya Prospek (M) Sdn Bhd holds 25% and Betapac the remaining 20%.

Based on these proportions, Jati Tinggi's share of the contract amounts to approximately RM312.51 million, while Kerjaya's portion is RM142.05 million.

In a bourse filing today, Jati Tinggi said the unincorporated joint venture received TNB's letter of acceptance dated Oct 21.

The project involves establishing the PMU 500/275/132/33/11kV Paka GIS transmission main intake substation.

Its scope includes the supply, installation, testing and commissioning of gas-insulated switchgear, associated equipment, buildings and civil works, as well as connections to transformers, overhead lines and underground cables.

The contract took effect on Oct 21, with completion required within 730 days of a commencement date to be determined later.

The consortium members will be jointly and severally liable for executing and completing the works.

Jati Tinggi said the award supports its pursuit of high-voltage power transmission infrastructure opportunities, including those arising from Malaysia's National Grid expansion, renewable energy integration and the longer-term development of the Asean Power Grid.

The group expects the contract to contribute positively to its earnings and net assets per share over the project's duration.

In a separate statement, Kerjaya CEO and ED Tee Eng Tiong said the award would expand the group's presence into Terengganu and broaden its exposure to infrastructure works.

"Beyond strengthening our order book, the award allows us to extend our project footprint into a new geographical market and broaden our exposure to infrastructure-related works."

He added that Kerjaya would continue exploring opportunities in new locations and project segments that complement its existing expertise. – **TMR**
